Syed-Wajahat-Ali 

OBJECTIVE

Result-oriented Material Planner with 4 years of experience in Planning, Inventory Management, and Procurement within a manufacturing sector. Possess graduation in Industrial and Manufacturing Engineering. Strong emphasis on Material Management, Communication, & Analytical skills.

EDUCATION

Bachelor of Engineering in Industrial and Manufacturing | NED University of Engineering and Technology

January 2014 – December 2017

CGPA 3.424

EXPERIENCE

Assistant Manager Material Planning | Midas Safety

January 2022 – Present

- Oversees inventory acquisition and ensure timely and adequate supply of materials needed for production.
- Maintain minimum or targeted stock levels and share liquidation plan to consume excess and obsolete materials SLOB.
- Review and release purchase requisition.
- Classify materials into the ABC Inventory system.
- Liaise with Sales, Operations, Production Planners, Quality, Research & Development (R&D), and Procurement Department.
- Monitor integrity of bill of material (BOM).
- Review production plans of more than 1000 SKUs and manage inventory accordingly.
- Work on SAP system ERP (PP & MM module) S4 HANA.

Senior Officer Material Planning | Midas Safety

September 2021 – December 2021

- Plan raw materials based on demand or consumption trend and generate purchase requisition accordingly.
- Do daily order reconciliation as per material availability, arrivals, and lead time of materials.
- Take follow-up concerning material shortages that affect production.
- Analyze changes in material demand or consumption and maintain safety stocks accordingly.
- Work on SAP system ERP (PP & MM module) S4 HANA.
- Do RCA (root cause analysis) and gap analysis where required.

Senior Officer Production Planning | Midas Safety

September 2018 – August 2021

- Prepare a production plan based on sales orders considering the availability of stocks, material arrivals, and production constraints.
- Do daily order reconciliation as per plants capacities and product lead time.
- Assist and analyze Sales and Operations Planning (S & OP) and rough-cut capacity planning.
- Generate daily and monthly planned versus actual variance reports.
- Secure 100% on-time delivery (OTIF/ DIFOT).
- Work on Lean Manufacturing Tools, i.e., KPI, OEE, KAIZEN, and 5S.

Inspection Engineer | Velosi Pakistan

May 2018 – September 2018

- Carryout yearly inspection of CNG Station all over the Sindh.
- To perform nondestructive testing of Tank Lorry within Customer's Premises.
- Monitor manufacturing processes and review standard testing of pipe manufacturing for OGDCL at supplier premises.

SKILLS

- SAP (PP & MM) Modules
- Microsoft Office
- Lean Manufacturing Tools
- Good Interpersonal Skills
- Excellent Data Analytical Skills
- Follow-up and problem-solving skills

TRAINING & CERTIFICATIONS

- Resource Planning & Detailed Scheduling
- Supply Chain Planning
- Supply Chain Management
- Strategic Supply Chain Planning.

PROJECTS

- Led Project "MRP Automation on key materials based on demand, consumption, & safety stocks. Implemented on 3 major material categories.
- To reduce Risk Matrices, Heat Map, and Audit Report Observations up to zero. Successfully closed all observations.
- Improved OEE (Overall Equipment Efficiency) by minimizing availability losses. Reduced up to 33%.
- Supported in smooth implementation of HUM (Handling Unit Management). Efficiently Implemented it in 3 MRP.
